

Managing COMPLEXITY the table

VISUALIZE COMPLEXITY

This is a silly tool to help you visualize the complexity of your project. Use the table “as is” or manage columns with entries particular to your project.

- Give each category a value from 1 to 5 which represents, in your opinion and personal experience the level of complexity for that particular category.
- Add the cells to get the TOTALA LEVEL OF COMPLEXITY FOR YOUR PROJECT. In the table below the maximum level is 35 and the minimum is 7.

Project Team	Owner Type	Construction Assemblies	Program	Codes and Regulations	Deliverables	Execution Time	Complexity Level
Choose level 1 to 5	Choose level 1 to 5	Choose level 1 to 5	Choose level 1 to 5	Choose level 1 to 5	Choose level 1 to 5	Choose level 1 to 5	Add cells in this row and get your Total Level of Complexity
